PREVENTIVE MAINTENANCE PROGRAM

Lowery Heating and Air, Inc. offers an annual Preventive Maintenance Program to provide you with peace of mind when it comes to your heating and cooling system. You will always know your system is working to its maximum efficiency, prolonging the system's life and, most importantly, saving you money and time.

Although regular filter changes are helpful, they do not prevent clogging. Clogged refrigerant coils and dirty fan blowers are the #1 cause of costly repairs and premature compressor failure. Servicing your system on a regular basis extends its life and enables it to work more efficiently. Our technician will come to your home to clean and inspect your system prior to the hot summer sun and the cold winter days. This will insure that your home will be comfortable inside ~ no matter what the weather is outside.

Preventive Maintenance Contract benefits include:

- Two scheduled precision tune-ups and professional cleanings per year, in spring and fall
- 24-hour emergency service
- 10% discount on parts needed for repairs
- Priority treatment – your service call will be placed ahead of others who are not under contract
- Experience fewer breakdowns and extended equipment life, resulting in lower utility bills
- Your contract may be cancelled at any time. You must be satisfied with the benefits you receive, or the unused portion of your annual contract will be refunded to you.

Billed annually, the cost for one system is only **\$ 150.00 per year**, and each additional system may be added for **\$ 75.00 per year**. If you would like to be enrolled in this program, simply return the attached page to our office.
